Soft tissue allograft engineered for placement in 30 seconds\textsuperscript{1} at a fraction of the cost of other solutions\textsuperscript{2}.
The **30-second augment** that minimizes additional operating time at a fraction of the implant cost of other patches.

**Ready-to-go**
Allograft that is stored at ambient temperature, does not require pre-hydration, and remains shelf stable for 5 years.

**30-Second Placement**
Implant placement time tested to be 17.7 seconds each (n=24).¹

**Less Expensive**
The size of DERMIS ON DEMAND™ Allograft allows surgeons to build up only what is necessary for each individual patient, preventing discarded tissue and significantly reducing cost.²

**Workflow Integration**
DOD™ Allografts, in many cases, can be inserted directly in line with the surgeon’s existing workflow.
DOD™ Allograft is intended for the supplemental support, protection, reinforcement or covering of soft tissue.

**OPEN DERMAL MATRIX™ Technology**

DOD Allografts feature OPEN DERMAL MATRIX™ Technology which has been shown, in pre-clinical animal models, to integrate better than tested traditional dermal allografts.3*

**Pre-Implantation**

![Pre-Implantation Image](image1)

**Post-Implantation** (6-week Athymic Rat Model)

![Post-Implantation Image](image2)

**Broad Compression**

Size 2 PERMACORD™ Suture with DOD Allograft provides a broader compression area than Fibertape® alone, which may correspond with more tendon to bone contact.5
How to Order

Please reach out to your DePuy Synthes Mitek sales consultant or contact Parametrics Medical Customer Service at 1-888-494-2240 or Sales@ParametricsMedical.com.
